***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to a single ply membrane roofing system and a roof deck in combination, classified in class 52, subclass 408.
- II. Claims 4-6 and 7, drawn to a method of securing a single ply membrane roofing system to a roof deck and a method of constructing a single ply membrane roofing system applied to a roof deck, respectively, classified in class 156, subclass 71.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the claimed single ply membrane roofing system and roof deck in combination can be made by another and materially different process such as utilization of a pre-applied adhesive layer on either first or second membrane so that when the second membrane is in a peeled back position from the first membrane, a releasable sheet is removed to uncover the pre-applied adhesive layer on the back of either the first or second membrane in order to adhere the first and second membrane to each other.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3635

A telephone call was made to Attorney John F. Learman on March 10, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
